

(up to 22inch monitor)

1

Align VESA mount to rear of monitor, insert 4 off fixing screws and tighten. Arrow on the back of the mount should point towards the top of the monitor.

2

Screw VESA bracket to Interface bracket through two fixing holes (as pictured). Ensure arrow on VESA bracket points to narrow edge of Interface bracket.

3

Locate assembled bracket clamp grooves into 8-way post.

4

Adjust and tighten 4 screws at side of Interface bracket until securely clamped to post in desired position.

5

Position monitor over bracket and lower until both monitor mount pins rest in bracket channels.

6

Insert screw up through bottom centre of assembled bracket and monitor mount, and tighten to secure monitor in place.
