

1

Ensure all components are available for assembly.

2

Erect frame structure ensuring grey magnetic connectors snap together.

3

Affix all vertical and two horizontal magnetic rails...

4

into their magnetic locators

5

Insert all three shelves by slightly tilting as shown above between rails and lower into position...

6**7**

The assembled structure should look like this.

8

Unroll the graphic and work your way round the front of the structure, ensuring the magnetic tape on graphic rear, affixes to exact position on the vertical magnetic rails. Align outer vertical edges of graphic with central line on the vertical magnetic rails at the back and affix.

Your counter is now ready for all types of promotional work. To dismantle the Mini Pop Up counter, reverse the assembly procedure. Ensure graphic is rolled up image side facing outwards.

9

Align slots and channel in the underside of table top with hubs and graphic, and carefully lower into position.

10

Secure the table top in place by wrapping the velcro (on the underside) around the frame tubing.

WARNING - the top must be secured every time the unit is assembled - **MANDATORY**.
