

Important note: These instructions are a guide. Formulate kits will have different configurations of poles and will create different shapes but they can still be assembled in the same way. Ensure fabric sleeve is orientated the correct way for your Formulate shape.

1 Lay out all components and connect bungee poles.

2 Match the same numbers and colours together.

3 Connect all the parts until you create the completed shape.

4 Optional step: Add support brace when instructed.

5 Make sure you have a clean surface and hands, cotton gloves are provided.

6 Place the fabric graphic sock over the Formulate shape making sure the graphics are the correct way round.

7 Gently pull graphics completely over the frame until you have a straight snug fit.

8 Pull the graphics together at the bottom of the tubing and zip up.
