Grafix Counter

We advise that artwork is only generated in the following design programs: Illustrator, Indesign Artwork to be saved as PDF at 100% scale Please use the template below for reference,

Submit two files
(i) to be sent at 100% without template
(ii) to be sent with template laid over artwork

Fonts

Please ensure all fonts used (both screen and printer fonts) are included. Where possible convert fonts to paths /outlines, particularly for PC generated files

Logos

Any logos should be created in Illustrator or Freehand, as a vector format for best quality.

Photographic Images

For images to be reproduced, without pixilation, a minimum resolution of 200 dpi at full size is required

Artwork size

Please ensure that the artwork is sized to the viewable area with any necessary bleed extending out to the overall size To be produced at 100% scale. Artwork to be saved without crop marks.

File size
If possible keep the file size below 10MB uncompressed.

IMPORTANT
Colours may vary depending on artwork supplied. Lead times quoted from receipt of artwork. Any amendments may be charged for if proofs are required
