

A straight linear counter, ideal for any modular application. Built with strength and durability practical for exhibitions and easily adaptable for all locations.

Features & benefits

- Anodised aluminium constructions
- Flat packed, easy to transport and quick to assemble
- No tools required
- 50mm modular post system
- A wide range of counter shapes can be created by arranging multiple counters
- Linear twist and lock
- Available in 1000mm and 2000mm wide
- Carry bag are available as extra cost options (AB112A and AB222)
- Optional internal shelf PK8-S1S

Hardware specifications

Hardware dimensions (mm):

LK028-001 1010(h) x 1000(w)

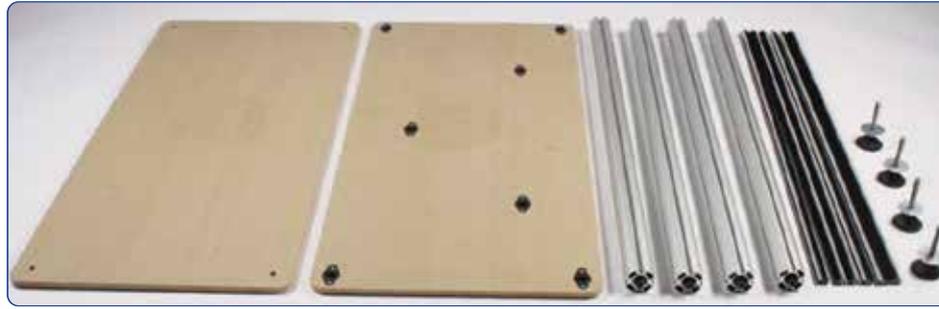

LK028-002 1010(h) x 2000(w)

Load Bearing:
 50kg approx

Graphic size (mm):

Recommended graphic size (mm):
 Please refer to Graphic template

Recommended graphic substrate:
 2-3mm thick foam board

Kit includes:
 1x table top,
 1x base,
 4x linear 50mm round post,
 4x adjustable feet,
 6x wing extrusion

Start by placing the top of the counter face down with the twist and lock locators facing up. Place the posts into the twist and lock locators and twist anti-clockwise to lock and clockwise to unlock

Place the base of the counter over the linear post and placed the adjustable feet through the washer and into the base of the counter. Screw into the post until in required position. Hand tighten the nut to secure into place

To attach the graphic simply click the PVC wing extrusion into the channel in the 50mm round post. Repeat this step for the remaining graphics.

Internal shelf assembly

To attach the internal shelf insert the twist and lock pole into the locator on the shelf

Lift the internal shelf to the shelf locator on the base side of the table top. Twist each pole into place until fully secure
