FABRIWALL® FABRIC DISPLAYS

Our best selling FABRIWALL® Fabric Displays are large format backdrops with a lightweight aluminium frame and a one-piece tension fabric graphic.

They offer a modern and eye-catching alternative to traditional Pop Up Stands and are 100% recyclable.

The printed fabric graphics are machine washable so you can get years of service from your display. No tools are needed for assembly, the number-coded frame system clicks together with a simple push-fit action and the fabric sock slides over the frame and zips along the bottom to reveal the finished display. Set up takes less than 10 minutes and can be completed by one person. Each display is supplied with a portable carry bag making it easy to store and transport between events.

We print our stretch fabric and sew/finish in-house to ensure the highest quality. Dye Sublimation fabric printing process creates a photo-quality, non-reflective, washable, crease resistant and fire-retardant printed textile to BS Standards.

POP UP EXHIBITION STANDS

Pop Up Stands are a printed backwall display, designed to make a big impact at exhibitions, trade shows and marketing events. Portable and easy to assemble, we supply each Pop Up Stand with custom printed graphics and exhibition counter case as standard. Our exhibitor bundles also include low-cost LED lights, folding beech top and graphic wrap that converts the transport case into a functional counter with additional marketing space.

Pop Up Stands can be set up within 10 minutes by one person, without tools or special training. No additional contractor costs are required. The complete exhibition stand packs down into the wheeled case and fits in the boot of most cars making it easy to transport between events.

We print all Pop Up Stand panels in-house to a high quality photographic standard. Artwork is printed on a 550-micron, 100% polyester, recyclable grey back pop-up media, via a water-based UV printing process for a professional, durable and long-lasting Pop Up Stand. No solvents are used during the printing process.

LINKED POP UP STANDS

Linked Pop Up Stands are the ideal system solution for creating a booth in your exhibition stand space or corner shell scheme.

Each exhibition stand is supplied with hardware to suit your space, custom printed graphics, low-cost LED lights and transport cases that fit the complete stand in. We also include a folding beech top and graphic wrap to convert the wheeled cases into marketing podiums and welcome counters. Linked Pop Up Stands require no tools for assembly and can be installed by 1-2 people. We print, manufacture and test build every Pop Up Display to ensure quality & precision.

FABRIC POP UP STANDS

Fabric Pop Up Displays are a portable, lightweight Pop Up system that is quick and simple to install and offers maximum impact. The one-piece printed fabric graphic is attached to the frame and stays in place when the frame is collapsed for storage – making it easy and quick to assemble and take down.

We pre-install a single seamless fabric graphic onto the aluminium frame using ultra-strong Velcro that is tensioned flat when you open the frame. No more panels to line up or hang, no more heavy cases and bulky frames - the complete fabric display can be stored and transported in the included carry bag!

Manufactured, printed & sewn in-house. The fabric is digitally printed in full colour using a dye-sublimation process. This sublimation process results in a permanent, high quality print which will not crack, fade, peel and can be machine washed multiple times giving you a long lasting display.

TENSION FABRIC STANDS

Despite their large configurations, our Tension Fabric Backdrops are extremely lightweight and portable. Each stretch fabric backwall consists of multiple Pop Up fabric displays which are butted up to each other to create a large back wall exhibition stand. They provide a modern and high-impact alternative to traditional PVC pop up stands and banners.

Using a combination of different fabric pop up stands we have created impactful displays that stretch up to 8m wide providing the ultimate display. Each stand includes low-cost LED lights as standard with optional fabric counters to complete your stand.

HOW DO I CHOOSE

THE RIGHT PAVEMENT SIGN?

Pavement signs allow you to reach potential customers who may otherwise not notice your brand or your premises. They provide an opportunity to grab the attention of a passer by who would normally walk straight by your business without hesitation.

With clever marketing and promotional advertising, you can increase your footfall, brand awareness and revenue all at the same time by using a simple advertising sign. But how do you choose from such a wide range of signs?

There are several factors that come in to choosing the right pavement sign for your business. You need to ask where is it going to be used? How frequently its going to be use? On what surface? Indoor or outdoors? The answer to those questions will help narrow down your options. You can use our handy buyers guide to help you find what you need quickly and accurately.

BUDGET

You get what you pay for as with everything else. Depending on your requirements and budget you should always buy the best you can afford. Consider the position and usage of your pavement sign as this will determine the type you will need.

LOCATION

Wind and weather will affect what advertising sign you need. For strong winds look for a design with a weighted base or water base and a panel board that can move in the wind with coiled springs or swinging panel design.

HIGH TRAFFIC AREAS

Consider placement of your pavement or street sign so there is plenty of space available around the sign and you're not obstructing pedestrians. Choose a size and style that is appropriate for your location but remember the bigger the sign the more likely it is to get noticed.

AESTHETICS

Style is important and pavement advertising has the potential to be the first thing people will notice. A well made sign that is kept clean and utilises attractive and salient artwork design can reinforce your brand image.

DURABILITY

You want your advertising sign to last and look good for months or years to come. By choosing a more sturdy or heavy-duty sign will give you many years of service and you will not need to replace it as often.

DESIGN

Bright, vibrant and well-designed artwork communicates a clear visual message that will get noticed. Keep your message or promotional advert simple, concise and easy to read from a distance.

CAFÉ BARRIERS

Café barriers create functional and practical spaces for your business that are eye-catching and branded. Typically found on the high street, in shopping centres and retail, they help to create a welcoming and professional look outside your business premises, and when printed with your branding, they will help to attract customers. We offer a range of ready-to-use kits in each of our different systems. If none of our kits suit your needs, you can create your own system by adding posts and printed banners together to configure your custom café barrier kit.
