MODULATETM

An attention grabbing solution

ModulateTM is the fusion of two original concepts, recognised for their success in the world of retail and exhibitions: Formulate, a range of tubular structures, and Vector modular frames.

ModulateTM consists of a set of frames made from aluminium tubes covered with a printed tension fabric graphic. These frames can be connected together using powerful magnets inside each element.

Based on this simple magnetic principle, the different **ModulateTM** frames combine to create the perfect configuration for every venue: retail outlets, trade shows, shell schemes, exhibition venues, shopping centre, or in office environments as simple partitioning for meeting areas.

MODULATE™

Innovative structures

Each **Modulate™** structure is made from aluminium tubes with a diameter of 30 mm, which makes them both light and durable.

This new family of products is set apart from other existing solutions by a range of unique features, including the **MagLink** system and the **Twist & Lock** foot system.

Need a change ?

With powerful 360° magnets, the **MagLink** system makes it easy to assemble **Modulate™** frames without the hassle of traditional clips add in or the need for Allen keys. These patent pending magnetic connectors and the 40 cm extension, allow you to vary the height of the structures, making **Modulate™** a very versatile and reconfigurable solution.

Save time !

Each element of the **Modulate™** range is designed to make your life easier: sections with colour co-ordinated numbering system, bungee poles and easy-to-install feet. No tools required! Assembling **Modulate™** is child's play, allowing you to change your configuration in seconds.

360° MagLink connector in each pole

Self-locking system with bungee poles and push-buttons

Central reinforcement tube (18 mm diameter)

Double-sided tension fabric. Zip system

Optional 400 mm extension to change the height of the structure

Simple assembly with numbered frame parts

2 stabilising feet with Twist & Lock supplied with each frame

Modulate™ carry bag with dedicated compartments for the feet and graphics

Modulate™ structures have a 5 year warranty

The structures are supplied with a pair of stabilising feet

Intuitive assembly with no need for tools

Assembling **Modulate™** structures does not require no tools. Each section is labelled by number and colour coded for ease of assembly, connecting with a push-button.

Once the structure is assembled, the Twist & Lock feet can be locked into place by rotating a quarter of a turn, for a perfectly stable free-standing frame. Add the perfect finishing touch with a tension fabric graphic, designed to fit the frame perfectly.

Stabilising feet with Twist & Lock system

1 Assemble the bungee sections using the push-buttons

2 Add the central reinforcement tube and connect all the tubes according to the numbered system

3 Place the Twist & Lock foot under the structure and rotate to lock it

4 Use the gloves provided to handle the graphic and slide it onto the frame

Position

Rotate

Lock

How to install Twist & Lock feet ?

We have created an innovative new foot system with no need for Allen keys or other tools. With the **Twist & Lock** system, simply position the foot under the structure, turn it and it's locked! This system is an incredible time saver when installing your **Modulate™** structures. Stabilising half feet can be added to your configuration to suit your needs (optional).

Stabilising half feet

Scalable structures

To add greater versatility to your **Modulate™** structures, you can add a 400 mm tubular extension, allowing you to change the height of your frame from 2000 mm to 2400 mm. Easily inserted between two sections, this extension allows you to use the same frame at two different heights.

Modulate™ 400 mm Extension
to change the height of your
structures
MOD-EXT400MM Ø 30 x 400 mm

2 height options

Simply position your
frames at your
desired angle

MagLink connectors: simple, fast and reconfigurable

Get original by combining the different sizes and
shapes of **Modulate™** frames.

Thanks to the exclusive **MagLink** magnetic system
built into the structure, you can connect the frames
together without any need for
or tools

 **PATENT
PENDING**

360° **MagLink** system. Each
structure includes 4 magnets that
allow you to connect the frames
together without any need for
or tools.

The Modulate™ range

Modulate™ includes 11 aluminium tubular frames (Ø30 mm) that can be used
with double-sided printed textile graphics.

These modules can be used by themselves or combined to create hundreds
of possible configurations. The different structures are classified according
to their width or shape. The colour of the module corresponds to the coding
system on the structure.

Each frame is supplied with a **Modulate™** carry bag with dedicated slots for
the feet and graphics.

Mix & Match

Modulate™ offers innovative layout solutions and maximises the impact of your message with sublimation printed textile graphics.

Choose your **Modulate™** frames from the shapes and sizes and on offer and connect them magnetically at any angle using the exclusive MagLink system.

You can mix and match to create new configurations or change them to suit your needs.

Switching from a simple wall of images to an exhibition stand takes just a few minutes!

Each frame features a coding system for easier assembly. No tools required!

The graphics are very easy to maintain thanks to the crease-resistant and machine washable textile cover.

Each Modulate™ frame comes in a bag to carry the structure, feet and graphics.
